Re: **Site Demolition Plans**
MGM Grand - Springfield
Springfield, MA

Dear Mr. Williams,

The Department of Public Works is in receipt of your submission of the Site Demolition Plan for the MGM Casino Project in Springfield. The following document has been reviewed:

- Sheet set titled Earthwork Parking Garage Site Demolition Plans for MGM GRAND - SPRINGFIELD, and accompanying narrative, prepared by Allen & Major Associates, Inc., stamped and dated February 23, 2016.

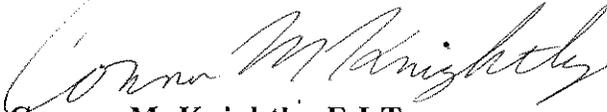

The Department of Public Works has reviewed your submission and has the following comment:

- General.

Sheet 9 of this plan shows excavation in the public right of way on both Howard Street and Bliss Street. At this time the current private property trenching permit ID# 20160309 does not allow for trenching in the public right of way. Along with this conflict, it appears that proposed subgrade footings encroach on the public right of way along Bliss Street and at the north-western end of Howard Street.

At this time the site demolition plan for the parking garage submitted is **conditionally approved** for construction with the following stipulations: No excavation for the garage foundation may be completed in the public right of way without prior permit coordination with the City of Springfield's Engineering Department. Additionally, the plans must be corrected to demonstrate that no portion of the proposed garage or its foundation/footing network will reside in the public right of way. Additional review of future plans and further revisions yet to be submitted are anticipated as well.

Sincerely,

Connor M. Knightly, E.I.T.
Civil Engineer
